

### **Personal Interest**

I am an outdoor person. Bike racings, rollerblading, ice-skating and snowboarding are some of my favorite activities. In fact, I used to compete in bike races, and I got tenth place in Taiwan's Teenager Division when I was 16 years old. I have always wanted to meet new friends and help people. Therefore, I joined the International Club and Phi Theta Kappa when I was in South Seattle Community College. I was also a volunteer at Asian community events and had been on a cycling team. Currently, I am a member of Taiwanese American Professional Society. Moreover, I love to listen to different kinds of music and I love to read computer magazines as well because I am always excited about what kinds of new technological products are coming up. I also enjoy going shopping, but it is only limited in electronic devices such as PDA's, GPS', computer components, and finger print readers.
